

## MULCHING

The Mulching program simply specifies that mulching shall only be applied in areas that can be seen from the road, sidewalk, or curbing and should provide an aesthetic appearance along with minimizing weeds growth

In areas of multi-tiered shrubs, leaf trimming shall be allowed to stay in place on the ground to serve as additional natural mulch as long as it is not visible from the street, sidewalk, or curb.

The primary mulch application shall be made in approximately November after the heavy rain season. A mulch dressing application shall be made to high visibility areas in approximately March.
